METAGRO
Delivering operating value

METAGRO
CABINS FOR BULK HANDLING

Operators of bulk handling cranes deal with shocks, movements and worse lines of sight due to the continuous moving of the operator cabin. Metagro knows exactly how to reduce complaints and create an environment that satisfies the operator under all conditions.

Metagro is well-known for its custom cabin solutions that make effective and healthy working a matter of course. When the cabin is equipped with our ergonomic Ergoseat, you can be sure the operator barely suffers from long shifts anymore when the operator no longer has to be seated in a poor situation.
